

MaSH

Real automation where it counts!

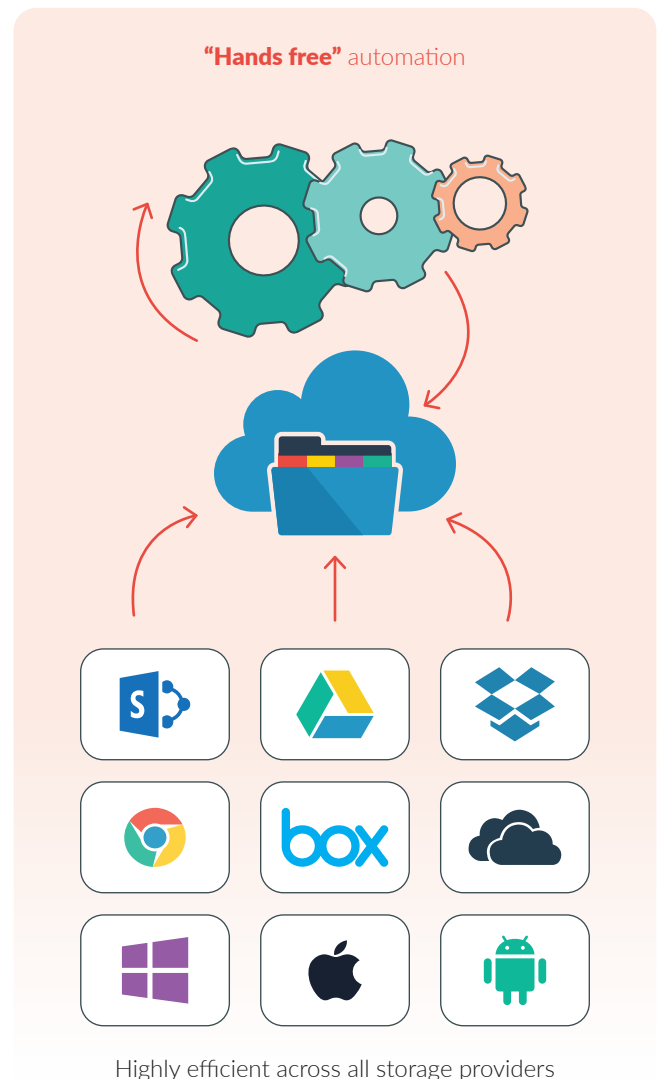

MaSH expands the Foldr platforms capability by enabling process automation.

Enabling automatic processes to be completed on either schedules or triggering events. MaSH opens a world of efficiency to any file on any storage platform.

MaSH can interact with all Foldr's integrated storage to complete almost unlimited tasks.

Data publication such as sending extracted data to external systems or data bases. Creation of files and documents.

Compression, duplication, movement, deletion even external publication of files can be easily and efficiently achieved.

MaSH

**Compress,
duplicate,
move,
more
efficiently**

Automated file and data sharing

Working in tandem with Foldr's unique document searching, data extraction and sharing capabilities MaSH enables true 'hands off' automation with a level of flexibility and cost efficiency unique to the market.

Making Stuff Happen (Any Stuff, Anywhere, Anyway)

MaSH feature list:

- Highly efficient scripting capabilities across all storage platforms
- API and Data source interaction
