

How to replace the Fuser on an e-Studio 407

Lift the "lid"

Press this button (to gain access)

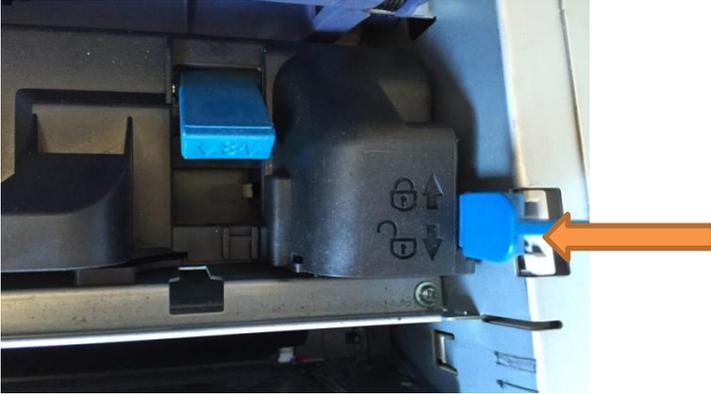

When cover is open it will look like this
(please note the black toner is missing in this picture)

The Fuser is indicated below (locked in position)

Unlock the fuser as indicated (left & right sides)

Remove fuser by gently pulling upwards using the handle

Replace the fuser with the new unit supplied and reverse the process detailed above (Don't forget to lock the fuser back in position!)

Now you've started to become a printer engineer!!!!
