

Why do schools love Foldr?

Access your on-premise files and files stored in OneDrive, SharePoint, Teams, Google Drive, Dropbox, and Box from a single interface.

Can operate as a SSO Identity Provider and central point for SAML-enabled applications or by being a part of an existing SAML Identity provision solution.

Collaborate and share effortlessly, work on files regardless of location. Great for classwork, homework, and group assignments.

Foldr has native apps for all your devices (Web app, iOS, Android, Windows, Mac).

Can integrate with your LMS to give you uninterrupted access to learning materials.

Easily find files with file indexing. Use to search your files across all locations.

Security and data protection:

- Schools **maintain control** of their on-premise files/folders
- Granular access control including **two-factor authentication**
- **End-to-end encryption** of data and integrity
- Compliance with **detailed audit trails** on activity

Easy to deploy:

- A **lightweight virtual appliance** built for any popular Hypervisor, installed in minutes
- **Low system requirement:** 1vCPU, 2GB Ram, 100GB disk space for the base system
- Integrates with **Active Directory** or can be configured to provide appliance-based accounts for smaller networks
